

## 2009 CYHRNet Student Internship Recipients: \$3500

Award Recipient	Description	Department	University	Supervisor
<b>1 Parmida Behmardi,</b> Undergraduate Student	Parmida will work on a follow-up study from the results of a qualitative interview study with parents of a child aged one to five with a disability or chronic health condition. She will also develop strategies to facilitate knowledge translation of research findings to health care professionals.	Microbiology & Immunology	University of British Columbia	Dr. Lise Olsen, Centre for Community Child Health Research
<b>2 Ruth Coupland, PhD</b> Student	Ruth will work with an international, multi-disciplinary research team on a comprehensive, longitudinal study of adolescent girls at high risk for involvement in aggressive and antisocial behaviour.	Psychology	Simon Fraser University	Dr. Marlene Moretti, Professor, Department of Psychology
<b>3 Jessica Flores, Masters</b> student	Jessica will work on a project that draws upon information from Health Canada's 'Injury and Poisoning Reporting Form' database. Using this database, Jessica will help compare and contrast self-reports of young persons whose injuries are classified as 'intentional' compared to 'unintentional'.	Psychology	University of British Columbia	Dr. Michael Chandler, Department of Psychology
<b>4 Emilie Jane Gladstone,</b> Undergraduate student	Emilie will help gather and analyze information about the medical, social and community health services available to parents of children with rare diseases and chronic conditions. She will help identify strategies that these parents use to access services.	Anthropology	University of British Columbia	Dr. William McKellin, Department of Anthropology
<b>5 Kayla MacKinnon,</b> Undergraduate Student	Kayla will be involved with several research studies in the area of health promotion and tobacco. Among other things, Kayla will consult with young mothers to gauge their interest in participating in research on this topic. She will also compile an inventory of tobacco/alcohol resources targeting pregnant teens and evaluate the reports on these interventions where they exist.	Health Studies	University of British Columbia- Okanagan	Dr. Joan Bottorff, Centre for Healthy Living and Chronic Disease Prevention
